### PRRI RELIGION AND POLITICS TRACKING SURVEY, AUGUST 2011

The survey was designed and conducted by Public Religion Research Institute. Results of the survey were based on RDD telephone interviews conducted between August 11, 2011 and August 14, 2011 by professional interviewers under the direction of Opinion Research Corporation. Interviews were conducted among a random sample of 1,006 adults 18 years of age or older living in private households in the continental United States.

The final sample was weighted to five different parameters—age, sex, geographic region, education and race—to ensure reliable and accurate representation of the total adult population.

The margin of error for the survey is +/- 3.0 percentage points at the 95% level of confidence. In addition to sampling error, surveys may also be subject to error or bias due to question wording, context and order effects.

## PRRI RELIGION AND POLITICS TRACKING SURVEY, SEPTEMBER 2011

The survey was designed and conducted by Public Religion Research Institute. Results of the survey were based on bilingual (Spanish and English) RDD telephone interviews conducted between September 14, 2011 and September 18, 2011 by professional interviewers under the direction of Social Science Research Solutions (SSRS). Interviews were conducted among a random sample of 1,013 adults 18 years of age or older in the continental United States (301 respondents were interviewed on a cell phone).

The final sample was weighted to six different parameters—age, sex, race, geographic region, education, and telephone usage<sup>1</sup>—to ensure reliable and accurate representation of the total adult population.

The margin of error for the survey is +/- 3.0 percentage points at the 95% level of confidence. In addition to sampling error, surveys may also be subject to error or bias due to question wording, context and order effects.

<sup>&</sup>lt;sup>1</sup> Telephone usage refers to whether respondents have only a landline telephone, only a cell phone or both types and the frequency with which they use each type.
